SOMMARIO

La distribuzione commerciale ha intrapreso, nei primi anni '90 e in un contesto di squilibrio economico (connesso alla intensa e duratura fase recessiva) e sociale (aperto dalla crisi del livello e del modello occupazionale), un processo di riassetto ed innovazione sia delle strutture sia delle forme di gestione. I primi effetti rilevabili e misurabili concorrono ad indicare che tale processo sta incidendo significativamente non solo sull'equilibrio consolidato del comparto stesso, ma anche su tutte le variabili economiche e sociali: rispetto alla organizzazione complessiva, alla dislocazione spaziale e ai flussi generati.

Il presente contributo è orientato ad individuare uno schema di organizzazione territoriale. Quello che risulta dal complesso di trasformazioni innescate dalla ristrutturazione del comparto della distribuzione commerciale in Piemonte.

L'obiettivo viene perseguito ricomponendo il quadro delle tipologie commerciali dei singoli comuni piemontesi. Le tipologie sono definite a partire da indicatori organizzati in una matrice 2x2 e, in particolare, due coppie riferite alla struttura dell'apparato distributivo (fissa o flessibile: "botteghe" e "centri" / "banchi" e "fiere", rispettivamente) e altre due riferite alla forma di gestione (consolidata o innovativa: "botteghe" e "banchi" / "centri" e "fiere", rispettivamente).

Il segno innovativo, dal centro commerciale al mercatino dell'antiquariato, propone anche il tema della estensione temporale dell'attività commerciale con la tendenza ad occupare e valorizzare spazi finora esclusi (i giorni festivi, le ore serali).

Il disegno territoriale che risulta dalla dislocazione dei comuni di più elevato rango commerciale tende a riprodurre, in mappa, una configurazione spaziale analoga a quella disegnata, all'inizio degli anni '70, dalla dislocazione dei grandi stabilimenti (oltre 1.000 addetti) di produzione di autoveicoli.

Il percorso di analisi conduce così a porre, e tentare di concorrere a verificare, una ipotesi interpretativa del processo complessivo di trasformazione socio-economica. Ovvero se si possa riconoscere, in Piemonte, un reciproco scambio di ruolo e di forma di integrazione settoriale fra le attività prevalenti di produzione industriale manifatturiera (auto, in particolare) e quelle di distribuzione commerciale. Tale scambio, innescato dagli effetti della innovazione tecnologica dei primi anni '80, può essere tratteggiato dalla seguente mutazione di scenario:

- a) fino a tutti gli anni '70 la produzione industriale è realizzata in grandi stabilimenti sia per l'elevata intensità di lavoro sia per la verticalizzazione del ciclo produttivo; la distribuzione commerciale è gestita da numerose piccole unità operative animate da lavoro autonomo diretto ed integrate pressoché soltanto orizzontalmente. In sintesi, l'industria produce ricchezza e ne ridistribuisce direttamente quote significative sotto forma di massa salariale che sostiene una distribuzione commerciale pur inadeguatamente organizzata.
- b) nei primi anni '90 la tecnologia innovata (microelettronica) consente all'industria di scomporre il ciclo produttivo in fasi di specializzazione ove operano piccole unità produttive a bassa intensità di lavoro, con minori vincoli localizzativi ed integrate orizzontalmente; la distribuzione commerciale sviluppa forme organizzative di grandi dimensioni ad integrazione verticale, che assorbono volumi significativi di lavoro salariato e si localizzano (shopping centers) lungo le principali vie di comunicazione. Qui riproducono "in vitro" i centri commerciali delle città saturati dal traffico e dall'insediamento dei servizi e in grado di ospitare solo forme commerciali innovative di tipo flessibile (mercatini dell'antiquariato). In sintesi, l'industria continua a produrre ricchezza, ma la funzione di redistribuzione sotto forma di salari spetta sempre più alla distribuzione commerciale che tende ad assumere un ruolo di traino dell'economia promuovendo attivamente l'assorbimento delle merci.

1. INTRODUZIONE

Per definire tipologie e rango commerciale dei comuni in Piemonte occorre utilizzare alcuni indicatori. Capaci di cogliere, descrivere e sintetizzare i caratteri localizzati del settore della distribuzione. Il riferimento è tanto agli elementi che si sono andati consolidando e costituiscono l'attuale struttura organizzativa dell'apparato distributivo, quanto alle tendenze innovative che si vanno affermando con incisività ed estensione.

Gli elementi consolidati non sono più soltanto le botteghe che la vecchia legge 426 (risale al giugno 1971) intendeva incominciare a selezionare in rapporto ad alcuni parametri di efficienza aziendale (dimensione minima della superficie di vendita, capacità professionali dell'imprenditore) e di compatibilità territoriale (i piani comunali di adeguamento della rete commerciale coordinati con i piani urbanistici e territoriali). Ne è sufficiente tener conto anche dei banchi ambulanti dei mercati rionali o zionali tradizionali. Occorre considerare, fra le forme consolidate di strutture commerciali, anche tutti i minimercati e quei supermercati e quei grandi magazzini di quartiere o "di prossimità" che costituivano ancora, al 1971, le uniche forme innovative proposte dalla "grande distribuzione".

Le tendenze innovative si riscontrano così tutte al di là degli orizzonti di riferimento della legge 426 e iniziano a confliggere con la legge 558 (del 1971, coetanea della 426) che regola gli orari dei negozi demandandone alle regioni la definizione e poi ai sindaci le specifiche modalità di attuazione. Si tratta di tipi strutturali e forme di organizzazione e di gestione che innovano rapidamente e radicalmente il modo di funzionamento dell'apparato distributivo con effetti sensibili e durevoli sui comportamenti sociali e sulla organizzazione territoriale.

Sono, in particolare fra le strutture di commercio fisso, gli ipermercati e i centri commerciali della generazione più recente che hanno

scelto una localizzazione sub-urbana o addirittura extra-urbana ampliando la loro portata gravitazionale a scala distrettuale o regionale con implicazioni che sono colte, in tutta la loro complessità, in una inchiesta del febbraio scorso: "Ogni sabato, circa 25.000 persone – individui soli, coppie, più spesso famiglie – percorrono in automobile ampie parti del territorio lombardo per visitare il centro commerciale integrato "Fiordaliso" di Rozzano, alle porte di Milano; 20.000 persone vi si recano il giovedì e il venerdì. 42.000 visitatori entrano ogni settimana nel centro Ikea, a Corsico, per un totale di 2 milioni di presenze annue. Almeno 50.000 "clienti" calcano a rotazione la domenica gli spazi del Forum polivalente di Assago, dove oltre ai servizi ricettivi e commerciali stabili si alternano eventi sportivi e musicali. Diverse migliaia di persone, quotidianamente, non solo a Milano, scelgono di concentrarsi entro i grandi contenitori isolati e introversi nati nell'ultimo decennio all'esterno delle nostre città, lungo le principali arterie di traffico" (Il Sole 24 Ore, 20 febbraio 1994). La qualità e la portata innovativa che caratterizza le recenti realizzazioni di ipermercati e centri commerciali in Italia, a partire dal nord, può essere colta appieno con riferimento alle esperienze già operanti da qualche tempo in Europa, in particolare in Francia (Urbanisme, n. 272-273 1994). Lo stesso "know how" realizzativo non è ancora perfettamente acquisito da noi, tanto che le prime iniziative italiane registrano in genere una compartecipazione di società estere europee, in particolare francesi.

Le forme innovative delle strutture flessibili tendono viceversa ad operare prevalentemente negli spazi urbani, in particolare in quelli centrali, e nei giorni festivi, precedentemente trascurati.

Sono, in particolare, i mercatini del piccolo antiquariato (o delle "pulci") che si sono andati rapidamente diffondendo e rafforzando all'inizio degli anni '90 in molte città del nord e del centro Italia. Tale fenomeno è stato tempestivamente colto, in Piemonte, e documentato fin dal suo primo apparire (cfr. le pubblicazioni "Mercatini delle pulci e del piccolo antiquariato qua e là per il Piemonte" a cura del servizio fiere della Regione Piemonte): ciò consente di disporre di informazioni relative non solo alla consistenza raggiunta, ma anche al rapido ed intenso processo di crescita. A tale processo non è estraneo il recente progetto

di realizzazione, nell'area torinese, del primo grande centro di attività integrate per l'antiquariato e le cose usate: "Eurodeballage", già parzialmente attivo dal giugno 1994 a Settimo Torinese e per il quale si prevede, entro il 1995, una superficie complessiva di 15.000 mq destinata a negozi di "brocanteurs", antiquari, restauratori, arredatori, laboratori di restauro e di formazione professionale, aree di esposizione, locali per "deballage" e fiere.

Una spinta comune di tutte le tendenze innovative segnalate è a oltrepassare i confini normativi che definiscono l'assetto organizzativo e funzionale preesistente. Nel senso di una estensione dell'attività ai giorni festivi e alle ore serali (già realizzata o proposta con forza) da parte di tutte le forme di gestione commerciale emergenti (comprese quelle in forma ambulante: è stata organizzata nel comune di Alba la manifestazione "antichità sotto le stelle" che prevede per tutti i venerdì sera, dalle ore 20 alle ore 24, dal 3 giugno al 23 settembre 1994, un mercatino dell'antiquariato). Nel senso di una realizzazione di grandi insediamenti suburbani che attraverso l'integrazione fra attività commerciali e altre attività legate al tempo libero tendono a sostituirsi ai centri storici delle città nel ruolo di attrazione e polarizzazione anche sociale. Nel senso di un innesco di nuovi processi di crescita della "grande distribuzione". La quale non si limita più ad occupare spazi di espansione vuoti e definiti dai differenziali europei di efficienza settoriale (17,1 negozi per mille abitanti in Italia a fronte dei 7,1 in Francia, dei 6,6 in Germania, dei 5,9 in Gran Bretagna, cfr. Il Mondo, n. 51-52 del 3 gennaio 1994). Bensì incomincia a competere con le stesse forme gestionali che hanno caratterizzato la sua prima fase espansiva (minimercati e supermercati) attraverso nuove forme gestionali e organizzative quali gli "hard discount".

2. GLI INDICATORI UTILIZZATI

Con riferimento all'assetto e alle dinamiche dell'apparato distributivo al dettaglio che si è tentato di delineare, i quattro indicatori prescelti, per definire il rango e le tipologie commerciali dei 1.209 comuni piemontesi, intendono riferirsi alle alternative strutturali e gestionali delle forme di esercizio dell'attività commerciale. Distinguendo, in termini strutturali, gli insediamenti fissi in locali od immobili a specifica destinazione (botteghe tradizionali e centri commerciali moderni) dagli insediamenti flessibili costituiti dai banchi ambulanti organizzati in mercati (rionali o zonali tradizionali e fieristici o del piccolo antiquariato di recente sviluppo). Distinguendo inoltre, in termini gestionali, le forme consolidate dei piccoli negozi e dei banchi ambulanti rionali dalle forme innovative della grande distribuzione e dei mercati delle "pulci".

Gli indicatori possono essere organizzati, in altri termini, nel seguente schema di rappresentatività:

		<i>gestione</i>	
		consolidata	innovativa
<i>struttura</i>	fissa	botteghe	centri
	flessibile	banchi	fiere

La rilevazione e la valutazione di botteghe, centri, banchi e fiere si ritiene consenta di cogliere, anche a scala comunale, i caratteri e le peculiarità dell'apparato distributivo al dettaglio. Si può notare che botteghe e banchi rappresentano anche le forme di insediamento a maggior diffusione localizzativa, nel senso che dipendono dalla localizzazione della popolazione, rispetto a centri e fiere che sono forme a localizzazione polarizzata con ampio raggio di attrazione e in larga misura indipendente dalla popolazione insediata in prossimità.

Occorre ancora precisare il contenuto di ciascun indicatore e le fonti di rilevazione delle informazioni utilizzate.

Botteghe

Si tratta degli esercizi del dettaglio in sede fissa, tradizionale e moderno diffuso. Per dettaglio moderno diffuso si intendono i minimercati alimentari e i negozi specializzati non alimentari con oltre 200 mq di superficie di vendita. I dati di base sono quelli raccolti dalla Regione Piemonte a fini di programmazione commerciale e sono temporalmente riferiti al 31-XII-1991: si tratta delle informazioni raccolte nella pubblicazione "Il Commercio in Piemonte 1992", quaderni di ricerca per la programmazione commerciale n. 17. Le entità rilevate sono le seguenti: il numero di esercizi tradizionali fino a 80 mq di superficie di vendita; il numero di analoghi esercizi con superficie superiore ad 80 mq e fino a 200 mq; i minimercati alimentari (e altri prodotti di largo consumo), ovvero i punti di vendita organizzati prevalentemente a libero servizio con superficie da 200 a 399 mq; negozi specializzati non alimentari con superficie superiore a 200 mq.

I comuni piemontesi sono stati suddivisi in quattro classi d'ampiezza determinate in rapporto alla consistenza quali-quantitativa della presenza di "botteghe". Le classi sono numerate in ordine crescente al crescere di tale consistenza, ovvero della entità e della varietà delle "botteghe":

- classe 1: assenza di esercizi commerciali o presenza di soli negozi fino a 80 mq di superficie di vendita (533 comuni);
- classe 2: presenza di esercizi fino a 200 mq di superficie (253 comuni);

- classe 3: almeno una presenza di minimercato alimentare o di negozio non alimentare specializzato con oltre 200 mq (152 comuni);
- classe 4: due o più presenze di minimercato alimentare o di negozio non alimentare specializzato con oltre 200 mq (271 comuni).

Alla classe 1 è indicata esplicitamente la modalità "assenza di esercizi commerciali" perché i comuni senza botteghe sono, a riprova della elevata frammentazione comunale piemontese, relativamente numerosi (32, pari al 2,6% dei 1.209 totali): si tratta, più in particolare, di 8 comuni in provincia di Alessandria (Berzano di Tortona, Carrega Ligure, Casasco, Castellania, Castelletto d'Erro, Gavazzana, Mongiardino Ligure, Montegioco); di 6 comuni in provincia di Vercelli (Caprile, Civiasco, Collobiano, Giffenga, Pistolesa, Vocca); di 3 comuni in provincia di Asti (Castellero, Quaranti, Serole); di 3 comuni in provincia di Torino (Massello, Moncenisio, Salza di Pinerolo); di 12 comuni in provincia di Cuneo (Bonvicino, Cissone, Elva, Igliano, Isasca, Macra, Montemale di Cuneo, Ostana, Roascio, Sale San Giovanni, Stroppa, Valloriate); soltanto in provincia di Novara non ci sono comuni privi di botteghe.

Banchi

Si tratta delle unità operative che esercitano il commercio su aree pubbliche in forma ambulante e secondo le modalità tradizionali di gestione. I dati di base sono ancora, come per le "botteghe", quelli raccolti dalla Regione a fini di programmazione commerciale (quaderno 17, citato) e sono temporalmente riferiti al 31-XII-1991. Si tratta del numero dei banchi presenti nei mercati ambulanti di ciascun comune piemontese: i banchi sono suddivisi in alimentari, non alimentari e di vendita diretta dei produttori; i mercati ambulanti sono suddivisi per località, per periodicità (annuale, stagionale), per frequenza (numero di giorni di presenza settimanale).

I comuni piemontesi sono stati suddivisi in quattro classi d'ampiezza determinate in rapporto all'intensità della presenza di "banchi" misurata in termini di banchi/settimana, ovvero di numero di presenze settimanali di banchi in tutti i mercati comunali. Le classi sono numerate in ordine crescente al crescere della entità dei "banchi":

- classe 1: assenza del fenomeno (n. 558 comuni);
- classe 2: presenze da 1 a 39 banchi/settimana (n. 472 comuni);
- classe 3: da 40 a 99 banchi/settimana (n. 100 comuni);
- classe 4: 100 o più presenze di banchi/settimana (n. 79 comuni).

Dal conteggio della distribuzione dei comuni nelle classi d'ampiezza definite emerge che l'ambulantato tradizionale opera in 651 comuni (il 53,8% del totale) mentre risulta assente nei rimanenti 558. La presenza di mercati ambulanti interessa la maggior parte dei comuni nelle province settentrionali del Piemonte: Torino (presenza in 216 comuni e assenza in 99), Novara (111 presenze contro 54), Vercelli (99 e 70). Nel sud Piemonte i banchi ambulanti interessano direttamente una minor quota di comuni: 108 contro 142 per la provincia di Cuneo, 44 contro 77 per Asti, 74 contro 116 per Alessandria.

Centri

Si tratta delle forme di esercizio del dettaglio moderno despecializzato, con l'esclusione dei minimercati alimentari, qui conteggiati, come si è anticipato, fra le "botteghe". Sono, più in particolare, i Supermercati, i Grandi Magazzini, gli Ipermercati e i Centri Commerciali. La fonte dei dati è un recente rapporto dell'Ires sulla situazione e sulla evoluzione del dettaglio moderno in Piemonte (cfr. la pubblicazione Attività di osservatorio n. 34, Ires, 1993, curata da Ivana Gautero, che rileva anche alcuni parametri qualitativi, in particolare le attività para-commerciali e i servizi offerti ai clienti, come criterio di controllo della denominazione centro commerciale, recuperando così alcune strutture quantitativamente incomplete: meno di 2.500 mq di totale area di vendita o meno di 8 negozi galleria). Il riferimento temporale delle informazioni è al 1992.

I Supermercati e i Grandi Magazzini sono i punti di vendita, rispettivamente alimentari e non alimentari, attraverso i quali la grande distribuzione organizzata si è presentata e sviluppata: entrambe le forme gestionali prevedono il libero servizio e una superficie di vendita superiore ai 400 mq (fino a 2.500). Gli Ipermercati e i Centri Commerciali sono le nuove forme evolute di dettaglio moderno despecializza-

to. In particolare, per Ipermercato si intende un punto di vendita con oltre 2.500 mq di superficie, un vasto assortimento alimentare e non alimentare, che dispone inoltre di un ampio parcheggio. Centro Commerciale si definisce invece una struttura fisico funzionale costituita da un insieme di attività commerciali al dettaglio di varia forma, tipo e merceologia, nessuna delle quali occupa un ruolo pressoché esclusivo; il complesso deve comprendere almeno otto punti di vendita e disporre di adeguate infrastrutture, di servizi comuni e di parcheggio e, inoltre, deve essere realizzato e gestito con criteri unitari. La dotazione di parcheggio (oltre alla maggiore dimensione) accomuna tali forme evolute e le differenzia da quelle precedenti: ciò dipende dalla tendenza di Ipermercati e Centri Commerciali alla localizzazione sub-urbana o extra-urbana, come si è già anticipato.

I comuni piemontesi sono stati suddivisi in quattro classi d'ampiezza determinate in rapporto alla qualità delle presenze di esercizi del dettaglio moderno organizzato. Tale qualità è valutata con riferimento sia al grado di evoluzione della forma commerciale, sia alla peculiare capacità di attrazione commerciale, e le classi sono numerate in ordine crescente al crescere di tale livello qualitativo:

- classe 1: assenza di Supermercati, di Grandi Magazzini, di Ipermercati e di Centri Commerciali (1082 comuni su 1209);
- classe 2: presenza della sola modalità Supermercato (66 comuni);
- classe 3: presenza della modalità Grande Magazzino, unitamente o no alla modalità Supermercato (22 comuni);
- classe 4: presenza della modalità Ipermercato e/o della modalità Centro Commerciale (39 comuni).

L'elevata frequenza di comuni registrata in classe 1 (1.082 pari all'89,5%) aggiunge un tratto importante al quadro finora delineato. È la estrema selettività localizzativa delle forme commerciali del dettaglio moderno organizzato. Che sono complessivamente presenti, in Piemonte, in un comune su dieci (127 pari al 10,5%). Fra i 39 comuni di classe 4, quelli ove si è localizzata almeno una delle due forme più evolute (ipermercato/centro commerciale), sono rispettivamente:

- 16 i comuni ove è presente la sola forma Ipermercato (Burolo, Leini, Moncalieri, Poirino, San Secondo di Pinerolo, Settimo Torinese, Trofarello

- i 7 in provincia di Torino -, Borgosesia, Ponderano, Vigliano Biellese - i 3 in provincia di Vercelli -, Borgomanero, Novara, Verbania - i 3 in provincia di Novara -, Castagnito, Cervasca - i 2 in provincia di Cuneo -, Pozzolo Formigaro - quello in provincia di Alessandria -);
- 12 i comuni ove è presente la sola forma Centro Commerciale (Alpignano, Carmagnola, Chieri, Chivasso, Rivalta di Torino - i 5 in provincia di Torino -, Omegna, Suno, Trecate - i 3 in provincia di Novara -, Bra - unico in provincia di Cuneo -, Alessandria, Casale Monferrato, Villanova Monferrato - i 3 in provincia di Alessandria -);
- 11 i comuni ove sono presenti entrambe le forme, Ipermercato e Centro Commerciale (Beinasco, Nichelino, Rivoli, S. Mauro, Torino, Venaria - i 6 in provincia di Torino -, Vercelli - unico nella sua provincia -, Alba, Borgo S. Dalmazzo, Genola - i 3 in provincia di Cuneo -, Acqui Terme - unico in provincia di Alessandria).

Da notare che nessuno dei 39 comuni di classe 4 appartiene alla provincia di Asti e che la rapida evoluzione del settore rende rapidamente obsoleti i tentativi di fare il punto della situazione. Ad esempio non è annoverato, in classe 4, il comune di Grugliasco, ove è localizzato il grande Centro Commerciale "Le Gru". Tale centro è stato inaugurato nel dicembre 1993, mentre il riferimento temporale dei dati qui elaborati è, come anticipato, alla situazione 1992.

Fiere

Si tratta delle forme innovative di commercio al dettaglio esercitato con modalità e con strutture flessibili. Sono state qui considerate le manifestazioni fieristiche di ogni livello (internazionale, nazionale, regionale, locale) e le fiere periodiche (fiere, sagre, feste patronali), così come vengono rilevate in due distinte pubblicazioni in forma di "calendario regionale" dei rispettivi eventi: si tratta degli allegati al Bollettino Ufficiale della Regione Piemonte del 22 dicembre 1993, denominati rispettivamente "Calendario delle manifestazioni fieristiche" e "Calendario delle fiere periodiche".

Il tratto innovativo che accomuna tutte le attività considerate sta nella sempre maggiore integrazione che si riscontra tra attività esposi-

tive, mercantili, promozionali, di spettacolo, sportive, ludico-ricreative in genere. Ciò modifica con sempre maggiore evidenza il senso, l'importanza e la capacità di attrazione di tali iniziative esaltandone il ruolo sociale ed economico.

Un tratto innovativo particolare può essere colto concentrando l'attenzione su un tipo di fiera periodica: i mercatini del piccolo antiquariato, o delle "pulci". Si tratta di un recente fenomeno di rapida e intensa crescita sia delle iniziative sia dell'interesse suscitato. La peculiarità innovativa sta nell'esercitare il commercio al dettaglio in forma ambulante secondo modalità temporalmente e merceologicamente complementari rispetto agli usi tradizionali consolidati. Ovvero, in altri termini, nuovi prodotti commercializzati in giorni festivi. Non solo: ma andandosi a localizzare in luoghi che divengono rapidamente centri di attrazione ad ampio raggio, mentre i mercati ambulanti tradizionali tendono ad andare a "servire" la popolazione là dove quest'ultima risiede (cfr. le pubblicazioni della Regione Piemonte "Mercatini delle pulci e del piccolo antiquariato qua e là per il Piemonte", nella edizione 1993, curata da Giovanna Terzi e da Susanna Viale e nella edizione 1994, curata da Anna D'Orsi e da Giovanna Terzi).

I mercatini del piccolo antiquariato presentano inoltre segni di radicamento e stabilizzazione trasformandosi in manifestazioni seriali a cadenza mensile che interessano, a rotazione, molti comuni ed occupano tutti gli spazi temporali festivi.

I comuni piemontesi sono stati suddivisi in quattro classi d'ampiezza determinate in rapporto alla quantità, alla varietà e al grado d'importanza delle manifestazioni accolte. Le classi sono numerate in ordine crescente al crescere del peso complessivo della presenza di "fiere" nei diversi centri comunali:

- classe 1: assenza di manifestazioni fieristiche e di fiere periodiche (873 comuni);
- classe 2: fino a 4 iniziative "semplici": manifestazioni fieristiche locali e fiere periodiche non seriali (271 comuni);
- classe 3: da 5 a 9 manifestazioni "semplici" oppure presenza di manifestazioni fieristiche di livello intermedio – regionali e/o nazionali – (36 comuni);

- classe 4: presenza di 10 o più iniziative complessivamente e/o presenza di fiere periodiche seriali e/o manifestazioni fieristiche di livello internazionale (29 comuni).

Le nove manifestazioni fieristiche internazionali sono tutte concentrate nel comune di Torino. Il riferimento temporale dei dati utilizzati per le elaborazioni è all'anno 1994, e il contenuto delle informazioni sono le iniziative organizzate entro il 1993. Si tratta dunque di una sorta di bilancio preventivo degli eventi che può subire modifiche a consuntivo, in particolare con riferimento alle fiere periodiche seriali che rappresentano la componente più dinamica fra quelle esaminate. Ad esempio, nel comune di Alessandria si svolge, nel corso del 1994, un "mercato delle anticaglie" nel centro storico con cadenza mensile che non è registrato nel calendario regionale: ciò ha determinato l'inserimento del comune di Alessandria in classe 2 invece che in classe 4. Ancora, nuove iniziative sono sorte nel corso dell'anno nei comuni di Cocconato, Montemagno, San Damiano e Costigliole – in provincia di Asti – e, in particolare, nel comune di Alba, già ricordate per l'innovazione dell'orario serale (dalle 20 alle 24). Anche il comune di Grugliasco, come quello di Alessandria, non è annoverato dalla fonte ufficiale fra quelli che ospitano fiere periodiche nel 1994 (Regione Piemonte, 1993) anche se il mercato delle pulci del terzo sabato di ogni mese è riportato nelle nuove fonti ufficiose che integrano le dichiarazioni dei comuni ("Mercatini delle pulci e del piccolo antiquariato qua e là per il Piemonte", citati). Si è scelto di non correggere i dati con le integrazioni acquisite nel corso del 1994: si è preferito mantenere il riferimento alle due pubblicazioni ufficiali (i Calendari Regionali, – Regione Piemonte, 1993 – pubblicati sul bollettino ufficiale della Regione Piemonte secondo il dettato della legge Regionale di disciplina delle attività fieristiche n. 47 del 7 settembre 1987), ciò anche al fine di agevolare il confronto fra le presenti informazioni e i successivi eventuali aggiornamenti.

Riepilogando, i 1.209 comuni piemontesi si ripartono, fra le quattro classi di ciascuno dei quattro indicatori prescelti, nel modo di seguito sintetizzato:

Tabella 1. Distribuzione dei comuni piemontesi nelle 4 classi di ciascuno dei 4 indicatori

		Numero di comuni			
Classi		Indicatori			
N. Incidenza nel comune		Banchi	Centri	Fiere	Botteghe
1	Nulla o scarsa	558	1.082	873	533
2	Medio-scarso	472	66	271	253
3	Medio-elevata	100	22	36	152
4	Elevata o significativa	79	39	29	271
Totale comuni in Piemonte		1.209	1.209	1.209	1.209

cada dei diversi comuni.

Il punto di partenza è in ordine di rappresentatività negli archivi organizzati gli indicatori, ovvero le matrici 2x2 classificate di tipo del paragrafo precedente. L'obiettivo è quello di compilare un primo di rilevazione delle informazioni contenute nelle indicatori (maxione dalle 4 classi d'importanza) che suddividono i comuni in 4 gruppi per ciascun indicatore.

Per poter fare un'analisi di rappresentatività si deve considerare due dati originali che debbano essere con la loro interazione, a quattro generali presenti nelle 4 classi ordinarie, i segmenti rappresentativi più indicatori e se si vuole anche quattro le quattro classi graduate che individuano le quattro classi d'importanza per ciascun indicatore. Le classi sono ordinate, a partire dall'origine degli indicatori, in presenza del "metodo più" ovvero dal minore al maggiore per i valori quantitativi, dal più semplice al più complesso proprio dell'impulso all'attività nel caso di tipologie qualitative.

L'indagine diretta di qualità rappresentativa: il risultato è una comparazione dei comuni e sposta l'indagine. I risultati della forma di esercizio organizzabile e variabile. Possibile sono posti nel caso ordinario quelli della forma e struttura che sono posti sull'asse verticale in opposizione, su di una scala, anche le due forme di gestione, tradizionali e consolidate, e innovative rispettivamente.

Per ciascun comune è possibile definire le classi d'importanza di appartenenza in rapporto a ciascun indicatore, che corrisponde ad una prima matrice di dati originali. Un'altra quarta parte dei risultati si riferisce al valore qualitativo e quantitativo di ogni classe (rispetto

3. LO SCHEMA DI CLASSIFICAZIONE

Occorre ora utilizzare congiuntamente i 4 indicatori per tentare una lettura d'assieme che costituisca una sintesi sinottica e simultanea delle informazioni ed una immagine dei caratteri e del peso commerciale dei diversi comuni.

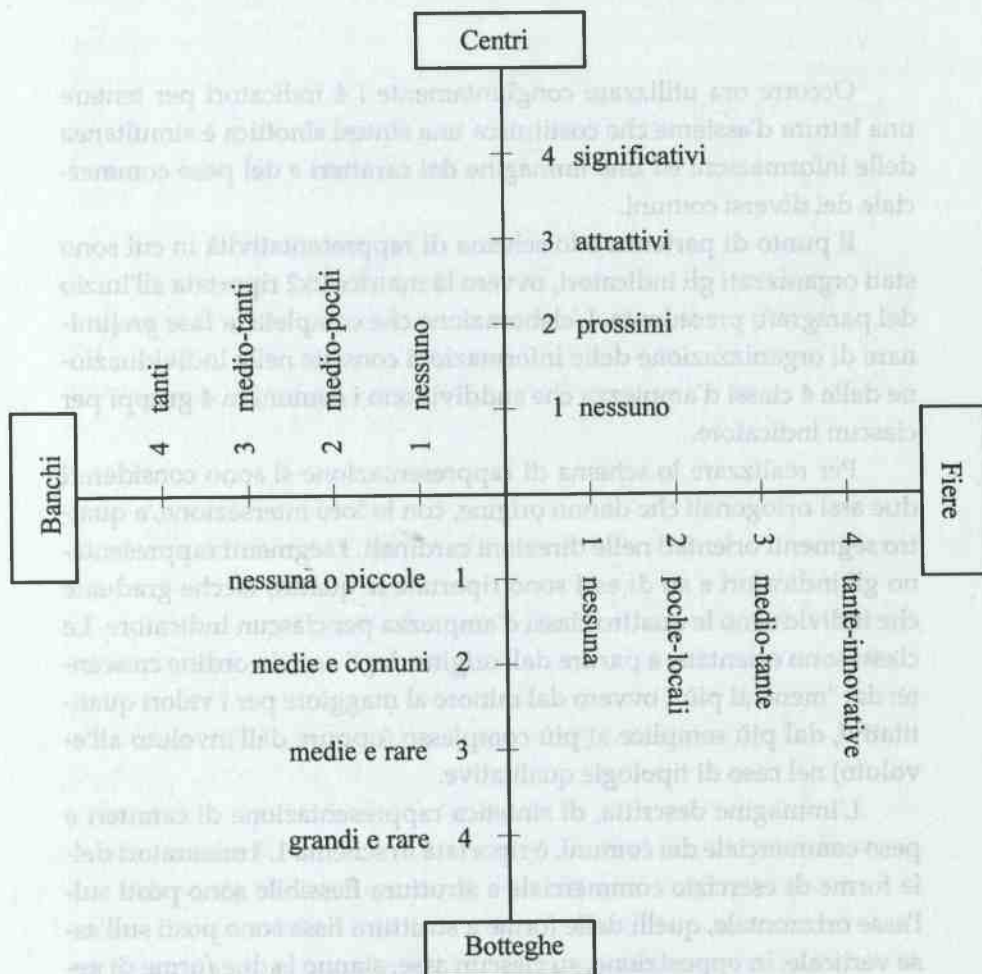

Il punto di partenza è lo schema di rappresentatività in cui sono stati organizzati gli indicatori, ovvero la matrice 2x2 riportata all'inizio del paragrafo precedente. L'elaborazione che completa la fase preliminare di organizzazione delle informazioni consiste nella individuazione delle 4 classi d'ampiezza che suddividono i comuni in 4 gruppi per ciascun indicatore.

Per realizzare lo schema di rappresentazione si sono considerati due assi ortogonali che danno origine, con la loro intersezione, a quattro segmenti orientati nelle direzioni cardinali. I segmenti rappresentano gli indicatori e su di essi sono riportate le quattro tacche graduate che individuano le quattro classi d'ampiezza per ciascun indicatore. Le classi sono orientate, a partire dall'origine degli assi, in ordine crescente: dal "meno al più", ovvero dal minore al maggiore per i valori quantitativi, dal più semplice al più complesso (oppure dall'involuto all'evoluto) nel caso di tipologie qualitative.

L'immagine descritta, di sintetica rappresentazione di caratteri e peso commerciale dei comuni, è riportata in schema 1. I misuratori delle forme di esercizio commerciale a struttura flessibile sono posti sull'asse orizzontale, quelli delle forme a struttura fissa sono posti sull'asse verticale: in opposizione, su ciascun asse, stanno le due forme di gestione, tradizionale (o consolidata) e innovativa rispettivamente.

Per ciascun comune è possibile definire la classe d'ampiezza di appartenenza in rapporto a ciascun indicatore, che corrisponde ad una precisa tacca su ciascun segmento. Unendo i quattro punti così individuati si ottiene un poligono quadrilatero variamente inclinato (rispetto

Schema 1. Rappresentazione di caratteri e peso commerciale dei comuni (*)

(*) Sull'asse orizzontale sono riportate le forme gestionali del commercio al dettaglio con strutture flessibili: sia di tipo tradizionale consolidato (banchi), sia di tipo innovativo (fiere). Sull'asse verticale sono riportate le forme gestionali del commercio al dettaglio con strutture fisse: sia di tipo tradizionale consolidato (botteghe), sia di tipo innovativo (centri).

all'ortogonalità dell'intersezione degli assi) e di maggiore o minore superficie.

Tale poligono restituisce appunto l'immagine dei caratteri (l'inclinazione) e del peso commerciale (la superficie) del comune rappresentato.

Fin qui il risultato è essenzialmente di carattere descrittivo. Le forme potenziali che tale poligono può assumere ammontano a 256, ovvero tutte le possibili combinazioni di 4 classi per ciascuno dei 4 indicatori. Ciò può anche costituire, rispetto ai 1.209 comuni piemontesi, una riduzione a valenza interpretativa del grado di variabilità dell'informazione, ma per giungere ad elaborazioni di carattere interpretativo-analitico occorre ridurre ben più drasticamente il numero dei gruppi rappresentati.

all'ortogonalizzazione dei vettori (e di conseguenza anche al
 prodotto.

Tale poligono restituisce appunto l'immagine del cubetto (il
 nastro) e del peso commutatore (la superficie) del cubetto
 nastro.

Fin qui il risultato è sostanzialmente di carattere descrittivo. Le
 tre potenziali che tale poligono può assumere sono: una a 120°, ovve-
 ro tutte le possibili configurazioni che il cubetto può assumere del 4
 e 120°. Ciò può anche costituire, rispetto al 120° cubetto, una
 riduzione a valore rappresentativo del grado di variabilità dell'infor-
 mazione, ma per giungere all'elaborazione di carattere interpretativo
 oltre occorre andare ben più distanziando il nastro del gruppo
 poligono.

Il diagramma illustra la relazione tra il Gruppo e l'Indice, mostrando le quattro possibili configurazioni del cubetto nastro. Le quattro configurazioni sono: 1. Gruppo e Indice, 2. Gruppo e Indice, 3. Gruppo e Indice, 4. Gruppo e Indice.

4. LA GRADUATORIA DI RANGO

La superficie del poligono rappresenta, si è detto, il peso del ruolo commerciale che caratterizza il comune considerato. In altri termini, si può confrontare il "peso" commerciale di due comuni misurando la diversa ampiezza della superficie dei rispettivi poligoni di rappresentazione. Tale operazione può essere semplificata ricorrendo al conteggio del numero di tacche di classe d'ampiezza inscritte nei rispettivi poligoni; se si conteggiano anche i quattro vertici dei poligoni stessi si ottiene, come misura di valutazione della superficie, un valore numerico corrispondente alla somma dei valori di ordinamento delle singole classi d'ampiezza di ciascun comune.

Ovvero, se si utilizza come punteggio il numero di ordinamento delle classi di ciascun indicatore e poi si sommano i quattro punteggi ottenuti da ciascun comune, si ottiene un valore numerico compreso fra 4 e 16 che può essere considerato un misuratore del peso commerciale del comune in esame. Ciò in quanto c'è corrispondenza non solo fra numero d'ordine della classe e incidenza dell'indicatore corrispondente (le classi sono ordinate "dal meno al più"), ma anche fra il valore numerico somma e l'ampiezza della superficie del poligono descrittivo. Per esempio, un comune caratterizzato da centri "attrattivi" (classe 3), fiere "tante/innovative" (classe 4), botteghe "medie e comuni" (classe 2), banche "nessuno" (classe 1), avrà un peso commerciale pari a 10 ($3+4+2+1$).

L'ordinamento dei comuni operato in base a tale misuratore può essere a sua volta inteso come una graduatoria di rango commerciale. I livelli di rango cui vengono assegnati i comuni sono complessivamente 13 (dal minimo 4 al massimo 16 compresi). La riduzione del grado di variabilità del dato è drastica rispetto alle 256 forme potenziali del poligono descrittivo. Il punteggio e la graduatoria di rango hanno dunque valenza interpretativa, oltre che descrittiva: si perde però l'informazione relativa ai caratteri commerciali, ovvero ai diversi mix che determinano lo stesso "peso" commerciale.

I comuni piemontesi si distribuiscono nei 13 livelli di rango commerciale, e per provincia, così come è riportato in tabella 2.

I dieci comuni che raggiungono il massimo punteggio di rango si concentrano nella provincia di Torino e, in particolare, nel cuore dell'area metropolitana. Si tratta, oltre al capoluogo Torino, di Moncalieri, Rivoli e Venaria appartenenti alla prima cintura metropolitana e di Carmagnola, Chieri, Chivasso appartenenti alla seconda cintura. A questi si aggiungono, nel resto Piemonte, i capoluoghi delle province di Vercelli e di Novara e il comune di Casale Monferrato in provincia di Alessandria.

Al livello immediatamente inferiore (rango 15) troviamo 7 comuni, tutti appartenenti alle province periferiche. Tre nel nord Piemonte, Biella e Verbania (in rappresentanza delle due nuove province di Biella e del Verbano-Cusio-Ossola rispettivamente) e poi Arona sul Lago Maggiore; gli altri quattro nel sud della regione: Alba, Cuneo, Asti e Novi Ligure. Per trovare Alessandria, l'unico capoluogo di provincia ancora non menzionato, occorre scendere al livello 14; analogamente, per trovare Grugliasco occorre scendere al livello 12: si tratta però della conseguenza di due errori (in termini sostanziali) di classificazione delle "fiere" individuati, ma non corretti per mantenere il riferimento formale alla fonte ufficiale dei dati, come si è anticipato nel paragrafo 2. e, data la rilevanza

Tabella 2. Distribuzione dei comuni piemontesi secondo i 13 livelli di rango commerciale e per provincia

Punteggio di rango (n. 13 livelli)	Numero di comuni per provincia						Totale Piemonte
	Torino	Vercelli	Novara	Cuneo	Asti	Alessandria	
16	7	1	1	-	-	1	10
15	-	1	2	2	1	1	7
14	9	-	-	5	1	2	17
13	9	4	2	-	-	2	17

5	61	31	39	47	26	34	238
4	49	47	32	80	53	67	328
Totale Piemonte	315	169	165	250	120	190	1.209

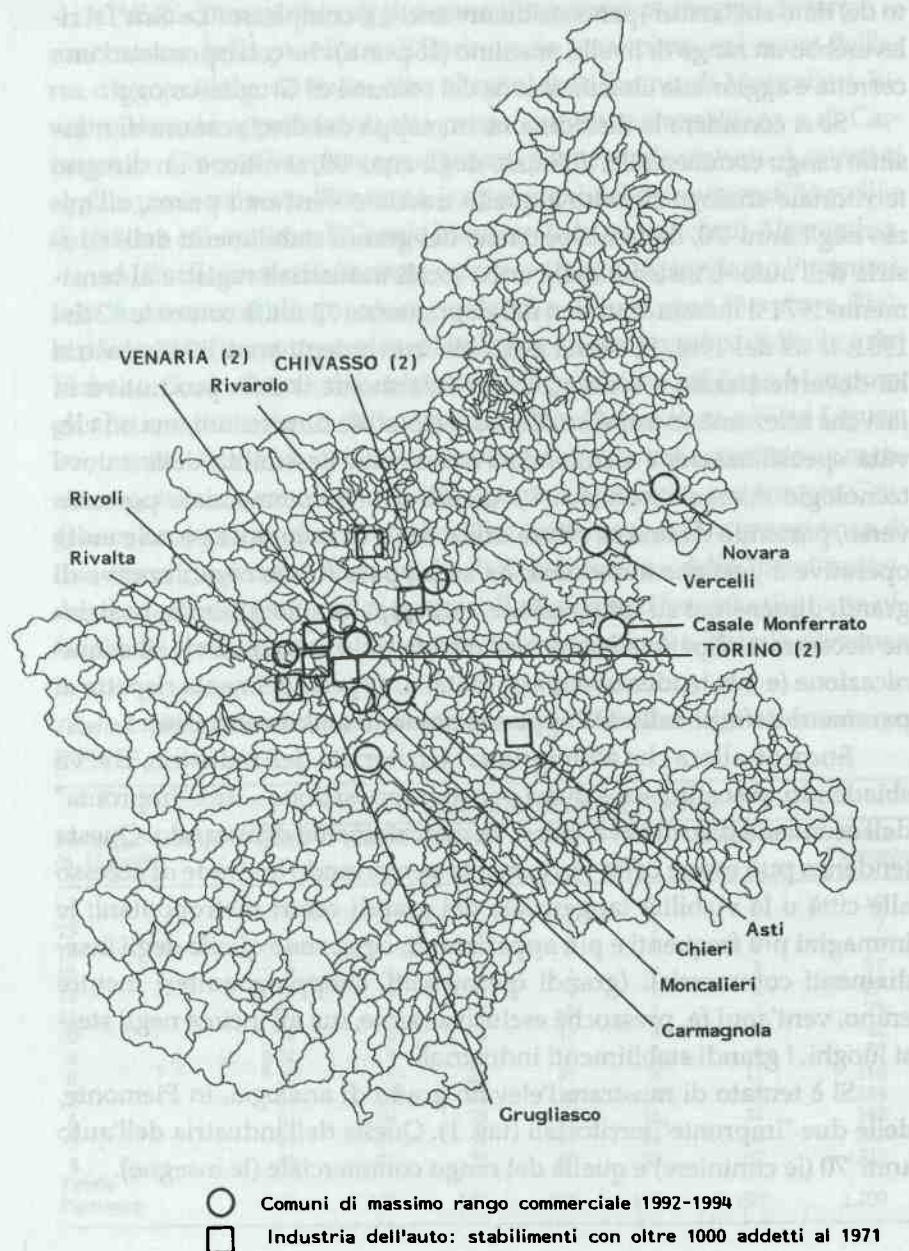

dei casi, si ritiene di dover esplicitamente ribadire qui. Nel caso di Grugliasco, se si aggiunge alla correzione relativa alle "fiere" l'aggiornamento del dato sui "centri" per considerare anche il complesso "Le Gru", si rivelerebbe un rango di livello massimo (16 punti) che corrisponde ad una corretta e aggiornata classificazione del comune di Grugliasco oggi.

Se si considera la dislocazione in mappa dei dieci comuni di massimo rango commerciale, all'inizio degli anni '90, si ottiene un disegno territoriale analogo rispetto a quello tracciato vent'anni prima, all'inizio degli anni '70, dalla dislocazione dei grandi stabilimenti dell'industria dell'auto. L'insieme delle unità locali industriali registra al censimento 1971 il massimo storico dal dopoguerra: 73 unità contro le 62 del 1951, le 69 del 1961, le 64 del 1981. Nel corso degli anni '80 l'industria ha deverticalizzato e scomposto modularmente il ciclo produttivo in fasi che selezionano imprese di medie e piccole dimensioni, ma ad elevata specializzazione sfruttando l'accresciuta flessibilità delle nuove tecnologie microelettroniche. La distribuzione commerciale per converso, partendo da una struttura orizzontale di numerose piccole unità operative a gestione autonoma, ha sviluppato forme organizzative di grandi dimensioni ad integrazione verticale che si localizza in posizione decentrata rispetto alle aree urbane lungo le principali vie di comunicazione (e tale tendenza appare, in Italia, appena delineata rispetto ai parametri definiti dallo sviluppo registrato in ambito europeo).

Succede allora che all'impronta" territoriale dell'industria, che va sbiadendo, si sostituisce – quasi per sovrapposizione – una "impronta" dell'economia distributiva, che si va marcatamente delineando. Questa tendenza può essere colta visivamente percorrendo le strade di accesso alle città o la viabilità tangenziale dei grandi centri metropolitani: le immagini più frequenti e più appariscenti, oggi, sono quelle degli insediamenti commerciali (grandi ipermercati, shopping center) mentre erano, vent'anni fa, pressoché esclusivamente, ma all'incirca negli stessi luoghi, i grandi stabilimenti industriali.

Si è tentato di mostrare l'elevato grado di analogia, in Piemonte, delle due "impronte" territoriali (tav. 1). Quella dell'industria dell'auto anni '70 (le ciminiere) e quella del rango commerciale (le insegne).

Tavola 1. Industria dell'auto primi anni '70 e distribuzione commerciale primi anni '90: analogia di "impronta" territoriale in Piemonte (le insegne rimpiazzano le ciminiere)

5. I GRUPPI TIPOLOGICI

Se i quattro indicatori, organizzati nello schema di rappresentazione (il poligono tracciato in base a schema 1), determinano e descrivono i caratteri e il peso commerciale dei comuni, e se il livello del rango commerciale interpreta ed analizza il peso commerciale dei comuni, allora quello che ancora occorre, è uno strumento capace di interpretare ed analizzare i caratteri della strutturazione commerciale dei comuni.

Tale strumento può corrispondere ad una classificazione dei comuni, quale quella che viene di seguito presentata, che individui gruppi omogenei per analogo assortimento qualitativo degli indicatori. Per raggiungere il risultato indicato, mantenendo la numerosità dei gruppi teorici entro limiti accettabili (le possibili combinazioni di 4 classi per ciascuno dei 4 indicatori ammontano a 256, che sono le configurazioni potenziali del poligono descrittivo) occorre ridurre drasticamente il numero delle classi d'ampiezza degli indicatori, che è la scelta qui operata rispetto all'alternativa di ridurre, altrettanto drasticamente, il numero degli indicatori. La scelta è determinata dalla considerazione che il maggior numero di indicatori significa maggiore ricchezza informativa, mentre il maggior numero di classi o modalità tipologiche degli indicatori significa, più semplicemente, maggiore dettaglio informativo.

Per conseguenza le quattro classi di ciascun indicatore sono state ridotte a due aggregando rispettivamente le due classi inferiori (1 e 2) e le due classi superiori (3 e 4), salvo nel caso dei "centri" ove si è isolata la classe 1 (connotata dall'assenza del fenomeno indagato in 1.082 comuni su 1.209 totali in Piemonte) dalle classi 2, 3 e 4 (accomunate dalla presenza di qualche unità della grande distribuzione in, complessivamente, 127 comuni). Il criterio generale è di suddividere i comuni piemontesi in due gruppi rispetto a ciascun indicatore. I gruppi sono connotati da una presenza significativa, oppure no, della forma commerciale che ciascun indicatore rappresenta. La consistenza, in termini di numero di comuni, delle coppie di gruppi risultanti è la seguente:

Tabella 3. Numero di comuni per significatività di incidenza degli indicatori

Significatività	Banchi	Centri	Fiere	Botteghe
NO	1.030	1.082	1.144	786
SI	179	127	65	423

Tabella 4. I 16 raggruppamenti teorici della classificazione

Gruppi	Significatività della presenza di:				Mix di indicatori significativi
	Banchi	Centri	Fiere	Botteghe	
1	NO	NO	NO	NO	niente
2	NO	NO	NO	SI	botteghe
3	NO	NO	SI	NO	fiere
4	NO	NO	SI	SI	fiere-botteghe
5	NO	SI	NO	NO	centri
6	NO	SI	NO	SI	centri-botteghe
7	NO	SI	SI	NO	centri-fiere
8	NO	SI	SI	SI	centri-fiere-botteghe
9	SI	NO	NO	NO	banchi
10	SI	NO	NO	SI	banchi-botteghe
11	SI	NO	SI	NO	banchi-fiere
12	SI	NO	SI	SI	banchi-fiere-botteghe
13	SI	SI	NO	NO	banchi-centri
14	SI	SI	NO	SI	banchi-centri-botteghe
15	SI	SI	SI	NO	banchi-centri-fiere
16	SI	SI	SI	SI	tutto

Emerge che le forme commerciali più diffuse sono quelle tradizionali consolidate: le "botteghe", con 423 presenze comunali significative, e i "banchi", con 179; seguono le forme innovative, ove ancora le strutture fisse dei "centri", con 127, precedono le strutture flessibili delle "fiere", con 65.

Il procedimento di classificazione dei comuni dà origine a 16 raggruppamenti teorici che sono originati da tutte le possibili combinazioni delle due classi o modalità residue (significatività o meno della presenza) di ciascuno dei quattro indicatori utilizzati.

Per precisare in qual modo 4 indicatori dicotomici, combinati fra loro, suddividono l'universo considerato in 16 gruppi si è riportato, in un prospetto (tab. 4), l'elenco delle diverse combinazioni di modalità degli indicatori che connotano ciascun gruppo. I gruppi teorici sono relativamente poco numerosi e i comuni sono accomunati da analogo

mix di indicatori significativi. La classificazione è dunque uno strumento interpretativo utile ad analizzare i caratteri degli apparati distributivi dei comuni.

I 1.209 comuni piemontesi si distribuiscono nei 16 gruppi teorici occupandone 15 soltanto: non è rappresentato il gruppo 7 che corrisponde al caso improbabile di presenza significativa delle sole forme commerciali innovative (centri e fiere) (tab. 5).

L'elevata frammentazione comunale piemontese fa sì che il gruppo più rappresentato sia il primo (747 casi di assenza di ogni significatività). Segue il gruppo 2 (232 casi con presenza significativa di sole botteghe). Se si aggiungono il gruppo 10 (56 casi con banche e botteghe) e il gruppo 9 (18 casi con solo banche), si raggiunge complessivamente un totale di 1.053 casi comunali (su 1.209 complessivi, con un'incidenza pari all'87,1%) ove il sistema distributivo è estremamente debole o comunque esercitato in forme esclusivamente tradizionali.

Per contro ci sono i 32 comuni del gruppo 16 che segnalano una significativa presenza di tutte le forme di gestione e di tutte le tipologie di esercizio commerciale al dettaglio. Di rilievo anche i 56 casi del gruppo 14 (significatività di banche, centri e botteghe).

Tabella 5. Tipologie commerciali dei comuni del Piemonte

Gruppi	Classificazione dei comuni per provincia						
	Torino	Vercelli	Novara	Cuneo	Asti	Alessandria	Piemonte
1	163	110	93	159	95	127	747
2	62	31	36	42	15	46	232
3	2	1	2	2	-	1	8
4	1	2	1	3	-	1	8
5	2	-	3	1	1	1	8
6	7	5	3	7	-	3	25
7	-	-	-	-	-	-	-
8	-	-	1	1	-	-	2
9	4	4	5	5	-	-	18
10	28	4	4	14	4	2	56
11	1	-	-	-	-	-	1
12	6	3	1	1	-	1	12
13	-	-	-	1	1	-	2
14	24	4	13	8	2	5	56
15	2	-	-	-	-	-	2
16	13	5	3	6	2	3	32

La dislocazione territoriale delle tipologie commerciali dei comuni piemontesi è raffigurata in cartina 2. Si è scelto di evidenziare i gruppi estremi: i 32 casi del gruppo 16 (i comuni con dotazione massima) e i 747 comuni del gruppo 1 (quelli con dotazione minima). Indifferenziati i casi residui: si tratta dei comuni appartenenti ai gruppi intermedi (i casi che presentano qualcuna, ma non tutte le 4 significatività teoriche).

Emerge una ben distribuita dislocazione dei 32 comuni commercialmente più dotati ed una distribuzione dei 747 comuni meno dotati lungo tutto l'arco alpino e nell'area collinare centrale: si tratta, coerentemente, delle aree caratterizzate anche dal maggior grado di frammentazione comunale.

CONCLUSIONI

Ricorrendo a soli quattro indicatori, per definire l'intreccio di forme strutturali e di forme gestionali nella distribuzione al dettaglio a scala comunale, si è percorsa una linea di analisi che ha consentito di determinare:

- a) una rappresentazione dei caratteri e del peso commerciale dei comuni (le 256 configurazioni potenziali del poligono descrittivo),
- b) un ordinamento dei comuni in base ad un indice che misura il grado di importanza commerciale dei singoli centri (i 13 livelli di rango),
- c) una classificazione dei comuni in gruppi omogenei di assortimento tipologico degli indicatori (i 16 gruppi tipologici).

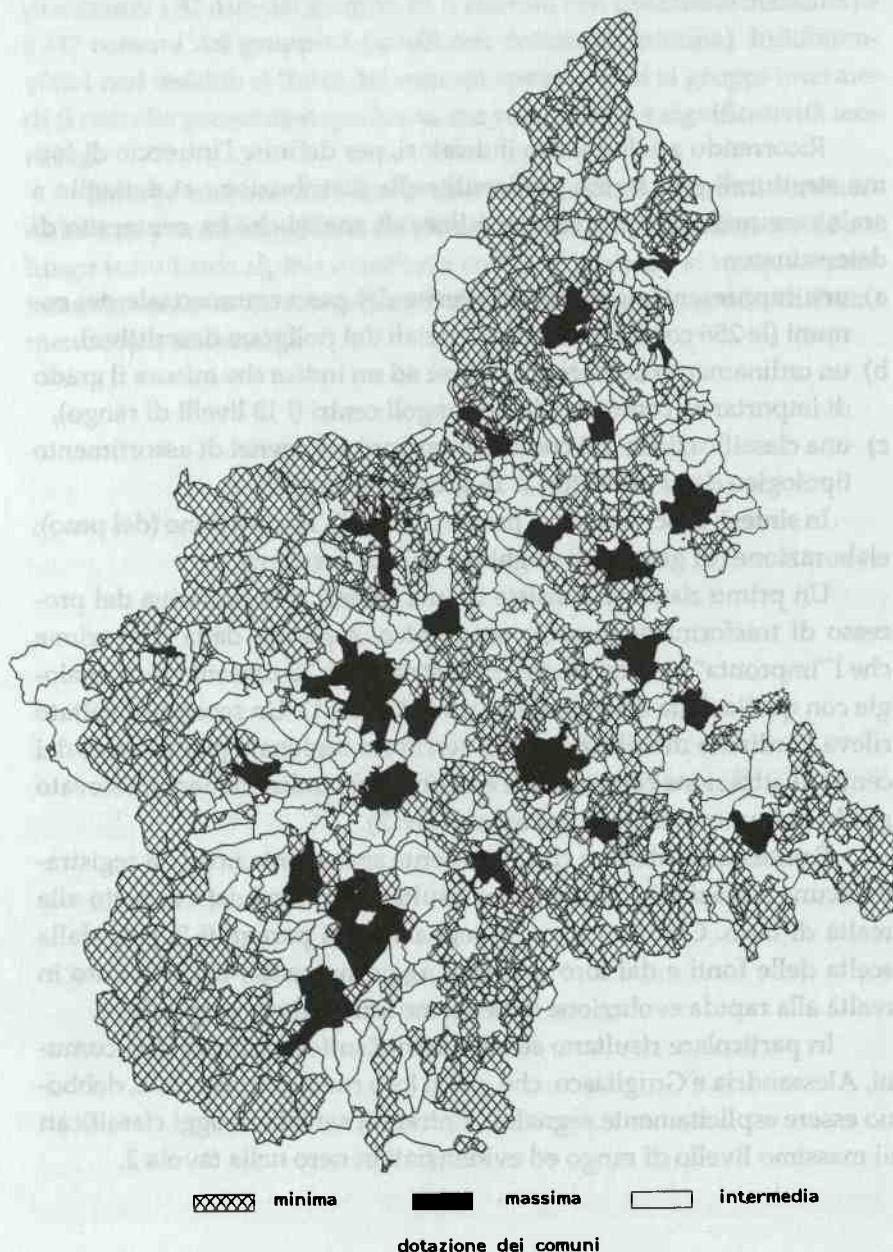

In sintesi: descrizione (di peso e caratteri), misurazione (del peso), elaborazione (di gruppi analoghi per mix di caratteri).

Un primo risultato consiste in una ipotesi interpretativa del processo di trasformazione socio economico, a partire dalla rilevazione che l'"impronta" territoriale dell'industria anni '70 presenta forti analogie con quella della distribuzione anni '90 (tav. 1). Un secondo risultato rileva l'ordinata distribuzione, sul territorio regionale piemontese, dei centri di attrazione commerciale e riconferma, indirettamente, l'elevato grado di frammentazione comunale (tav. 2).

È necessario ribadire che la presente sperimentazione ha registrato alcune situazioni comunali che risultano sottovalutate rispetto alla realtà di fatto. Ciò deriva, come segnalato nei paragrafi 2. e 4., dalla scelta delle fonti e dal loro grado di aggiornamento, ma è dovuto in realtà alla rapida evoluzione delle forme innovative: centri e fiere.

In particolare risultano sensibilmente sottoclassificati due comuni, Alessandria e Grugliasco, che, per il loro ruolo commerciale, debbono essere esplicitamente segnalati. Entrambi sarebbero oggi classificati al massimo livello di rango ed evidenziati in nero nella tavola 2.

Tavola 2. Tipologie commerciali dei comuni piemontesi: rappresentazione dei due gruppi estremi di dotazione ed attivazione commerciale

Im.	_____
Data	_____

L'Ires è un ente pubblico regionale, dotato di autonomia funzionale.

L'attuale Istituto, disciplinato dalla legge regionale 3 settembre 1991, n. 43, rappresenta la continuazione dell'Istituto costituito nel 1958 ad iniziativa della Provincia e dal Comune di Torino, con la partecipazione di altri enti pubblici e privati e la successiva adesione delle altre Province piemontesi.

L'Ires sviluppa la propria attività di ricerca a supporto dell'azione programmatoria della Regione Piemonte e della programmazione subregionale.

Costituiscono oggetto dell'attività dell'Istituto:

- la redazione della Relazione annuale sull'andamento socio-economico e territoriale della regione;
- la conduzione di una permanente attività di osservazione, documentazione ed analisi sulle principali grandezze socio-economiche e territoriali del sistema regionale;
- lo svolgimento di periodiche rassegne congiunturali sull'economia regionale;
- lo svolgimento delle ricerche connesse alla redazione ed all'attuazione del piano regionale di sviluppo;
- lo svolgimento di ricerche di settore per conto della Regione e altri enti.
